

Title: Routine Traffic Stop

Description: The Packet Police intercepted this capture. It looks like 1,000 packets of standard internet background radiation, but we suspect some contraband slipped through the noise. Mind digging through the trash?**AUTHOR** - BLU3KY

walkthrough

Step 1: Extract the Hidden File

Method 1: Using Wireshark (GUI)

1. Open `challenge.pcapng` in Wireshark.

2. Apply the display filter:

...

http

...

3. Look for:

- * `GET /downloads/super\_secret\_file.png`

- * Followed by a `200 OK` response.

4. Navigate to:

...

File → Export Objects → HTTP

...

5. Locate the PNG file, click Save, and open it.

6. The image contains a QR code.

Method 2: Using Binwalk (CLI)

1. Run the command:

...

```
binwalk --dd='png:png' challenge.pcapng
```

...

2. Open the extracted folder.
3. Locate the PNG file and open it.
4. Scan the QR code.

Step 2: Decode the QR Output

After scanning the QR code, you get the hex string:

```
...  
43 54 46 7b 66 69 6c 74 65 72 73 5f 61 72 65 5f 69 6d 70 6f 72 74 61 6e 74 7d  
...
```

Step 3: Convert Hex to Text

1. Go to CyberChef.
2. Use the "From Hex" operation.
3. Paste the hex string.

Final Flag:
